

Collection city for youth APP

Scenario of the project:-

we decided to make an interview with the main peoples that form an important role in this project such (students – supervisors of the storey – cooker – manger).

*First scenario with a student his name is **tarek** in the 3rd band he inhabits in this city :-*

Developer:- *Hi, what's your name?*

Student :- *I'am Tarek.*

Developer :- *can you tell me the routine of your day in this city and what the thing that make you under the press?*

Tarek :- *really, I face some obstacles such the daily attendance , the system that the kitchen follow to feed the students , the enrollment of my papers to this organization every year to be a member of this city .*

Developer:-*can you give me some information in details about your movements to accomplish these tasks?*

Tarek :-*ok, every day,this require from me to go to the supervisor of the storey to enroll my self in the cheet of the attendance by using my ticket and this take a time and if I lost this ticket I will not have the meal of the next day this for attendance, for the kitchen ,there are a chaos in the system because there over-crowded of student and there is a leak of meals because some students have more than one meal by using the ticket of others ,for the enrollment this require from me to travel to the city to apply my paper for the next year and this make me more exhausted.*

Developer :- *ok , thank you for these informations.*

Tarek :- *thanks*

Second scenario with the – supervisors of the storey:-

developer:-*can I collect from you some of information about the system ?*

mr Mohamed :-*why not ?*

Developer :- *what the procedures that you follow to enroll the student?*

mr Mohamed :-I use the data cheet for enrollement and this is very boring and this is very better if these data computerized .

Developer:-ok, any thing would you need to add ?

mr Mohamed :- no, thanks

3rd scenario with the – cooker that works in the kitchen:-

Developer:-can I collect from you some of information about the system when the student come to have a meal till he leave the kitchen?

cooker :-why not, you are welcome. !

Developer :- what the steps that you follow to make sure that the student have a meal?

cooker:- the student come with here ticket and his id the examine his id and take the ticket then he have a meal at the end we collect the ticket and count it and compare it with the number of the student the make enroll the day before.

Developer:- ok , from your view ,what the thing if that added it will make these steps very easy and go smoothly?

Cooker :- if it steps computerized.

Developer :- thank you for these informations.

REQUIREMENTS:-

For student : student can enroll himself in the daily attendance from the form of attendance over a website and this screen will be at the pc of the supervisor of the storey with out the ticket.

-and if he enroll his information go to the database of the kitchen to have a meal for the next day.

Student can upload his papers over the website of the city with out travelling

Cooker :- can know the student over his only id thought comparing his photo and the id over the screen of the kitchen.
